Translating Technology Capabilities into Business Possibilities

TekNirvana, short for *Technology Nirvana*, symbolizes the perfectly aligned and synergistic relationship between business and technology. TekNirvana's mission is to help its clients cut through marketing hype, get to the bottom of a technology, and assess its applicability in the real world — their world.

TekNirvana seeks to help its clients transform their technology investment into actionable, strategic assets thereby bringing them one step closer to technology nirvana, or "*TekNirvana*" — the ultimate technology bliss. We believe in working with you to understand your needs and recommend technology-centered solutions based on these needs rather than market hype or the unfounded desire to apply the latest and greatest technology.

Strategy & IT Enablement

INNOVATIVE IDEAS... HOLISTIC SOLUTIONS... HIGH VALUE RESULTS

The TekNirvana Solution Sphere™

Real Solutions for Real Problems

TekNirvana has developed an ecosystem of solutions based on proven methodologies, industry best practices, lessons learned from previous engagements, and insights gained from research and other thought leadership activities. Our solutions provide "tangibility" to our services and differentiate us from the plethora of other so-called consulting companies that talk a great game but lack the substance needed to deliver results and produce outcomes.

Tek-Inova™

Practical Innovation Management

Innovation is not a luxury... it is a necessity for being competitive in our global economy. We can help make your innovation initiatives more open, transparent, collaborative, and participatory so that they consistently result in real and tangible outcomes.

CloudNirvana™

Simplify Your Cloud Migration Journey

Assist organizations accelerate the transition to the cloud with a full suite of Cloud Computing services, including Data center transformation roadmap and architecture; policies, procedures and processes for day-to-day operations; and Certification and Accreditation for your cloud-based entire system.

NirvanaOps™

Integrate Your Entire Delivery Lifecycle

Help organizations adopt and embrace a DevOps culture and mindset with a full range of DevOps services, including Continuous Development using Agile SDLCs, Continuous Build Solutions, Continuous Deployment, Continuous Monitoring, and Infrastructure as Code services.

CyberTek™

Proactive Cybersecurity and Compliance

Comprehensive cybersecurity support helps organizations protect reputation, brand, and other intangibles; safeguard critical business and information assets; build in security as part of doing business; and make security proactive rather than reactive.

NirvanaAnalytics™

Valuable Insights into Your Big Data

Support organizations with holistic data analytics guidance to reduce costs by finding more efficient ways of doing business; make faster, better and higher confidence decisions based on real-time data; and gain a competitive advantage by satisfying true customer needs.

ValueTek™

Maximize Your Business Value from IT

IT assessment and modernization services, including that help evaluating if technology is helping or hindering meet business/mission goals, provide an investment roadmap for improving technology use, and implement modernization strategies.
